

Trenchless Technologies Training

JBP Sewer Assets Management courses

JBP Consultancy Services Asia Sdn. Bhd. offers training programs, through short courses, to professionals working with sewer pipeline maintenance, rehabilitation and assessment, using trenchless technologies.

Our courses keep professionals such as engineers and technicians up to date with the latest skills and knowledge, enabling them to carry out effective inspection, assessment, reporting, selection and application of techniques, solutions and technologies for sewer pipeline asset management.

New Course: Sewer CCTV Condition Classification

Benefits to delegates:

- Gain an understanding of the background to sewer deterioration, and use and importance of condition surveys in sewer rehabilitation.
- Obtain a detailed knowledge of the Sewer Condition Classification Coding system, and the ability to identify and correctly code faults in sewers - essential to effective pipe assessments!

Benefits to employers:

- Engineers and technicians who feel competent to make accurate CCTV Sewer inspections and report results.
- Systematic and consistent approach to reporting and interpretation of CCTV Sewer inspection results throughout the decision making chain.

Dates and Duration:

- Commencing **28/02/17**
- **3 days**

Course outline:

- Sewer CCTV Inspection
- Sewers and pipe deterioration
- Sewer condition categorisation
- Sewer condition coding
- Reporting requirements
- Manhole codes

Certification:

- Independent assessment by the WRc.
- Successful candidates will receive a course certificate from the WRc.

Course Materials:

- Folder with course content provided.

Course Fees:

- **RM 550** per day (*min. 3 days*)
- Light refreshments, lunch, course materials and course certificate included.

Course places:

- Limited to 25 candidates.

This is a globally recognised WRc training course for professionals working with all key aspects of sewer and manhole inspection, assessment as well as conditions coding, and follows the widely accepted specifications laid out in the 5th Edition of the Manual of Sewer Condition Classification (MSCC5).
