

SEWERAGE JOURNEY IN MALAYSIA

INTRODUCTION

Indah Water Konsortium (IWK) is a national sewerage company in Malaysia. IWK has been entrusted with the task of developing and maintaining a modern and efficient sewerage system for West Malaysia. In 1994, the Federal Government awarded the company the concession for nationwide sewerage services which prior to that, was under the responsibility of local authorities. Since then, IWK has taken over the sewerage services from local authorities in all areas except the States of Kelantan, Sabah, Sarawak and the Majlis Perbandaran Johor Bahru.

A modern and efficient sewerage system is vital for the country so as to ensure that wastewater is treated before being discharged into our rivers. This will help preserve the country's waste resources, protect public health and provide a cleaner and safer environment. In 2000, the Minister of Finance Incorporated, took over the entire equity in IWK from its previous private owners. IWK is now well-positioned to undertake the vital task of ensuring that Malaysians today and in the future will be able to enjoy a clean and healthy environment through a proper and well-maintained sewerage system.

IWK also advocates the need to enhance knowledge and skill of staff and practitioners in the sewerage sector locally and at international level. Join us in at exploration of how things where and where it is at today.

TRAINING STRATEGY

Theory, requirements, specification and hands-on application training, live demonstration as well as real on site simulation could be used to complement and facilitate training and teaching at the Indah Water Training Centre or onsite or offsite. This is made possible by proper plan and wide variety of fecal sludge treatment facilities in different parts of the country. The treatment systems available also provide theoretical lecture room and an experimental practical trial and safer hands on training activity at mock sewerage facilities. The mock sewerage facilities allow participants to experience the closest-to-real working situation.

SJM CONTENT

The SJM training includes:

- Introduction of sewage and Malaysia historical sanitation journey; which explain the national framework, evolution, policies, issues, successful outcome and lesson learned.
- Laws and legislation that govern sewerage activities in Malaysia, regulator functions and perspective complete with a Q&A session with sewerage regulator if needed.
- Briefing on Operational, Customer Relations, Finance

- Demonstration of desludging activity.
- Electrical control panel with various components, circuit breakers, float switches and motors for simulation exercises.

SERVICES

- 2 coffee breaks
- Lunch
- A variety of menu offered
- 6 rooms
- 157 person occupancy
- Material production
- Audio
- Visual
- Free Wifi
- Free parking
- Study Tour of Treatment Plant KLR340
- Mock Up facilities

- Monday to Sunday
- Nearby Light Rail Transit (LRT) Bukit Jalil Station
- Onsite visits to Sewerage Treatment Plants
- Consultation
- Study tours
- Exploration visits

TARGET AUDIENCE

Facilitators
Lecturers
Non-Government Organizations
Trainers

Government Agencies
Multi-National Companies
Private Organization

COURSE FEE

3 days training for 10 pax, at **RM3000 per pax**

Course fee includes:

Airport pick-up to hotel and return

F&B during training

Transportation to training site, site visits and return to hotel

Trainers fee

(Exclude Accommodation fee)

Site visit and demo staff fee

Training Facilities Fee

Training Modules fee

Admin and printing fee

6% Government Tax
